

ROLL&FIGHT'S EB05.005

Folding bag PPE with wheels

Bag for the transport of PPE and other personal items of the firefichte. Made of highly resistant material and with water repellent treatment, this bag incorporates wheels for easy transport. Its rolling structure allows for better storage and the bellows of the base allows to expand its capacity in a remarkable way.

Features

- Main material ripstop polyester waterproof and with water repellent treatment.
- Flexible and rollable structure to optimize storage.
- Zippers with ample reflective handles and welded trolleys that give extra resistance.
- Double reinforced and padded handle at the ends for easy handling.
- Double reinforced upper handle with padded piece.
- Removable reinforced shoulder strap.
- Side net pockets for the auxiliary material. Reflective band night/day.
- Elastic cord for the external support of tools and other utensils.
- Non-slip base resistant to friction and wear.
- Wheels for easy transport.
- Large diaphanous interior, expandable thanks to its bellows and includes a large zipped pocket for personal belongings.
