Περιγραφή

ΤΕΕ-UU PROFI Θήκη Ζώνης Εξοπλισμού Πυροσβέστη Small

The small counterpart to the MASTER Holster and bestseller among the respiratory protection holsters. With this holster you have all essential equipment directly at hand. Two medium-sized interior pockets are suitable to hold large timber wedges, small torches, rescue scissors or knives, labeling markers or ribbons and more. Two approximately 40 cm long holding lines with carabiner protect the material against loss. The large interior compartment provides sufficient space to hold rescue sling, HMS carabiner, notepad and pens. Two exterior elastic loops securely store timber wedges, torch or rescue knife for immediate access. Two large Vario double-loop straps with wide hook-and-loop fasteners allow for firm attachment to the firefighter belt, respiratory protection device or normal belt. A large marking area on the interior cover allows for permanent labeling. The 50 mm broad reflective stripe provides additional safety.

- size: 15 x 12,5 x 6 cm
- material: 370G TEC fire retardant
